BETTER TOGETHER

LineSlip + Riskonnect: The Complete Risk Management Solution

Two Powerful Platforms. One Solution.

The integration between LineSlip Risk Intelligence and the Riskonnect Insurable Risk platform creates a comprehensive risk management ecosystem that transforms how organizations understand, analyze, and optimize their insurance programs.

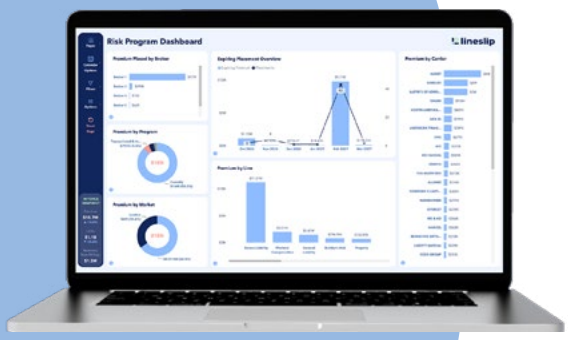
The Riskonnect Advantage

Riskonnect's Insurable Risk platform is the industry's leading solution for managing all insurable risks in one place:

- **Centralized Risk Data Management:** Consolidate all your risk, claims, policy, and exposure data in a single, integrated system
- **Claims Administration:** Streamline the entire claims lifecycle from first notice of loss to settlement
- **Policy and Renewal Management:** Efficiently track insurance policy information and automate renewal values collection process
- **Exposure Management:** Monitor changes in exposures and understand their impact on your risk profile

The LineSlip Advantage

LineSlip Risk Intelligence transforms how you interact with your insurance data:



- **Automated Data Aggregation:** Convert program documents into business intelligence reports, dashboards and visualization tools without manual entry
- **Program Visibility:** Easily access all your program data including premium allocations, historical trends, coverages – by line, broker and carrier
- **Broker/Carrier Relationship Management:** Optimize carrier and broker partnerships with detailed spend analytics
- **Simplified Renewals:** From pre to post renewal, you'll save time, be more prepared and experience better outcomes
- **Strategic Decision Support:** Make data-driven decisions about risk retention vs. transfer with comprehensive program insights
- **Business Continuity:** Maintain institutional knowledge with historical program data securely stored and accessible

Better Together: The Integration Advantage

When Riskonnect and LineSlip join forces, risk managers gain a powerful advantage:

1 Complete Risk Intelligence Ecosystem

- Combine LineSlip's policy data analytics with Riskonnect's claims and exposure data
- Create a comprehensive view of your total cost of risk (TCOR)
- Analyze correlations between policy structure, claims experience, and exposures

2 Streamlined Data Flow

- Eliminate redundant data entry between systems
- Insurance program data is automatically extracted by LineSlip and flows directly into Riskonnect while aggregate loss data is fed into LineSlip from Riskonnect
- Maintain data integrity with single-source-of-truth architecture

3 Enhanced Strategic Decision Making

- Move beyond tactical insurance policy management to strategic risk leadership
- Support data-driven renewal strategies with integrated claims and policy analytics
- Deliver executive-ready insights to stakeholders across your organization

LineSlip + Riskonnect Integration

Enhance risk financing decisions with best-in-class insurance data management

Quantifiable Business Impact

The integration delivers measurable benefits to your risk management function:

- **Time Savings:** Significantly reduce manual data entry, freeing staff for strategic initiatives
- **Decision Quality:** Make more informed risk financing decisions with complete program visibility
- **Negotiation Leverage:** Enter carrier discussions with comprehensive data on program performance
- **Reporting Efficiency:** Generate executive-ready reports in minutes instead of days or weeks
- **Business Continuity:** Ensure critical insurance knowledge is captured and preserved regardless of staff changes
